

Innovation, Engineering & Product Development

**Do you have an idea but need help scaling up and taking it to market?
Do you have sales now, but need to be able to increase your output to meet demand?**

Our Engineering and Design department are ready to help you take your idea to market and ensure that your company is able to meet the demands of new customers. If you are an existing company that suddenly has to ramp up production and increase throughputs and output we are ready to ensure you meet the needs of your customers. We combine our expertise and experience to bring you end-to-end solutions. Whatever your challenge is, whatever stage your business is at, contact one of our experts today and get the Kilmarnock advantage working for you!

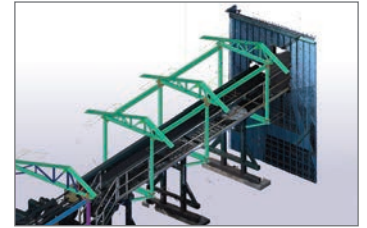

Our team can manufacture custom equipment to your specifications and drawings, or you can have our machine design experts develop a custom solution for you.

Our experts can assess your current equipment installation/workspace to ensure that it is properly guarded and code compliant. If new guarding is needed we can design, fabricate and install.

We have the experience, the experts and the certification to design, fabricate and install any process and power piping system.

Ask our team to provide you with building 3D scanning services and ensure that your innovation or upgrade project executes flawlessly.

Our experts will ensure that you are able to bring your product to market, meet market demands and growth needs. Our expertise includes:

Machine Design

Building 3D Scanning Services

PSHSR & Machine Safety / Guarding Designs

Process and Power Piping Systems

Hydraulic & Pneumatic Design

Process Engineering Support

Structural Engineering

Tooling & Fixturing Design
