

# Manufacturing Process Improvements

**Do you have too much waste?  
Struggling with older equipment?  
Interested in improving productivity  
and efficiency?**

**W**e tailor our comprehensive offerings and solutions to suit your needs! Combining extensive experience and expertise we work with you as your trusted partner. We build every customer relationship on a foundation of mutual respect and teamwork, our goal is to be an extension of your team. Trust us to exceed your expectations every time with our commitment to be on time, on scope and on budget.

It's a highly competitive world out there and your plant has to compete globally. We understand this and have the expertise and specialized skills to ensure that you achieve your goals. From consulting services, engineering and design, fabrication and installation through to maintenance and 24/7 support, you can count on Kilmarnock.

Our custom equipment design and fabrication services are at your service, whether we are fabricating to your specifications and design, or you need us to help design customized equipment for your plant.

When older equipment becomes obsolete and you can no longer replace it or obtain parts, we can reverse engineer and provide you with new parts or an entire new piece of equipment.

We offer Installation and commissioning to ensure that new equipment and machinery are integrated and running smoothly and your operations are optimized.

We offer a full range of maintenance services to ensure your operations run efficiently with less downtime and breakdowns.

**Our experts will help you achieve your optimization and improvement goals.**
