

Custom Equipment Building

Do you need a custom piece of equipment or machinery designed, fabricated and installed?

Are you an equipment manufacturer from outside of Canada that would like to get your equipment built in Canada in order to meet Canadian regulations, requirements and certification?

Whether you have the design ready or need us to design for you, we are ready to fabricate your custom equipment and machinery to exacting specifications with attention to detail and the highest quality work and craftsmanship. Our master craftsmen thrive on working on custom projects and crafting unique machinery and equipment.

Trust your food and pharmaceutical grade machinery fabrication and installation to Kilmarnock. We combine our expertise from multiple industries with our master craftsmen to deliver a superior product to you.

Provide us with your design, or turn to our team to create a custom design solution for you. We provide concept engineering & development support and services in order to provide you with the best solution.

Our shops are well equipped. Our skilled tradesmen and professional staff pursue continuous training and upgrading to stay abreast of the latest skills and expertise.

Draw upon our cross-industry knowledge, expertise and fabrication skills to develop prototypes and scaled machines for testing, feasibility and production runs.

We draw on over 30 years of experience and cross-industry knowledge to deliver end-to-end solutions for you. Our expertise includes:

Concept Engineering & Development

Prototype & Scaled Machines

Full Process Lines

Industrial Machinery

Food / Pharmaceutical Grade Machinery

High Corrosion / Erosion Parts & Equipment
